A faultless individual with outstanding length, growth and frame. Upon examination of his data, he ticks most boxes for positive calving ease, low birth weight and exceptional carcass merit. Top 5% for EMA in a really easy doing phenotype.

The first of the autumn offering of Reiland Zone Z93. These bulls are well structured, easy doing and 100% sound temperament. If you are looking for outcross options, don't overlook this individual who emanates from the 553 cow that Roland Lucas imported from New Zealand. Positive calving ease (top 10%), below average birth, high growth (+93) and top 25% for IMF%. A great all rounder.

Could be one of the "smokers". Terrific length and body depth combining real "outcross" opportunity for Precision and 036 bloodlines. A real easy doing frame 6.5 sire that will produce standout feeder steers and replacement females. His dam is an up-and-coming donor option for Reiland.

"Awesome" in modern-day speak! This bull is a true meat machine with B+ muscle, thick top and figures to boot. Super sound in the legs and feet from a dam who herself is a "wow factor" cow. A2 makes them a good, consistent type with acceptable birth through to top 5% for 600 day growth. Combine this with top 10% milk and impressive carcass, it makes him hard to go past for a self-replacing herd and feeder steer operation.

A young sire for all-round performance and right for these tough times. Frame 5 (ET) sire from one of Reiland's best performance donors W232. Looking across his data set, it has him well described as a high performance, early growth (+94 for 400d growth) bull in a mid-maturity package. EMA EBV at +4.9 places him in the top 10% for this trait and similarly for IMF%. Use over larger-framed cows with confidence.

These Boyd on Target sired bulls are real power individuals. Thick-butted, sound-footed with impressive muscularity. Interestingly they demonstrate impeccable structure and mobility for the tough times we are currently enduring, due to positive fat and slightly lesser frame. Ideal "real world" bulls and a power of genetic strength.

A pedigree packed to the rafters for every trait. A sire with positive calving ease, top 30% for 600dwt in a stout, thick-boned easy doing individual. If your herd needs an injection of doing ability, here is your sire. Dam T508 was an outstanding individual in her own right given her ancestry back to the popular Elsa K179 cow.

A tested AM Free Solution sire from the iconic S116 cow. She is still walking the hills as spritely as any young 3y.o. cow, with perfect feet, udder and teats. A high growth sire at +98 (600dwt) in the top 15%, neutral carcass fat and positive IMF% at +1.3. Will mature into an impressive individual given this new / old genetic blending.

Highly credentialled young sire with standout birth to growth and positive calving ease at +1.6. Suitable for joining heifers or main cow herd. Impressive +1.5 for IMF% that places him in the top 15% of the breed. Will develop into an ideal mid-maturity, easy doing sire of top weaners and replacements.

A tested curly calf-free AI/ET son of carcass king G A R Solution. Ample scale and length from his dam Q37 who reigned as #1 donor for years, despite her age. A lot to like about this bull with a great spread of growth numbers, high end EMA and IMF data (top 5%) and plenty of grunt. Difficult to go past this run of bulls who are only part of the sale due to contemporary groupings.

Look at this bull if you think Angus have lost their punch. Standout Boyd on Target son with near perfect arithmetic. Low birth, high milk, growth, positive fat and carcase in a super sound package - a real front paddock bull that will breed outstanding steers and replacement heifers. His 2008-drop brother is highly consistant with this type.
